## PROFILE

Skilled and motivated FrontEnd Developer and with a background in mechanical engineering who wants to be a full stack developer. I have strong foundations in HTML, CSS, JavaScript, and UI/UX design, and I'm committed to creating responsive and user-friendly interfaces. My combined skills in front-end development and DevOps allow me to design and build high-quality websites while ensuring smooth deployment and efficient management. I'm committed to continuous learning and improvement and excited to contribute to any team's vision.

## PORTFOLIO

My portfolio showcases my skills as a front-end developer using React. It features a modern design with smooth animations and includes sections for my bio, education, skills, and projects. The projects section highlights my expertise in creating dynamic and interactive websites using React, including examples of responsive layouts, API implementation, and popular libraries and frameworks.

## EDUCATION

### Meta Front-End Developer Professional Certificate, Coursera

Online

Sep 2022 — Feb 2023

- Gained proficiency in HTML5, CSS, and JavaScript, with a focus on front-end development.
- Learned how to create responsive layouts, program with JavaScript, and use React to build scalable and maintainable web applications.
- Through advance React module, I learned how to interact with a remote server and fetch and post data via an API, and gained experience in testing React applications using the React Testing Library.
- In addition to technical skills, the course also covered principles of UX/UI design and research. I learned how to create wireframes and high-fidelity prototypes in Figma, a popular design tool.

### IBM DevOps and Software Engineering Professional Certificate, Coursera

Online

Mar 2023 — Present

- I am currently pursuing this Specialization from Coursera. The specialization covers a wide range of topics related to software development and engineering. I have already gained knowledge in DevOps principles, including CI/CD, Infrastructure as Code, TDD, BDD, software engineering practices, and cloud native microservices.
- Additionally, I have completed courses related to cloud computing, agile development, back-end app development with Node.js and Express, and containerization with Docker, Kubernetes, OpenShift, and Istio.

## OBJECTIVES

---

- I aim to become Full stack developer.
- Get experience in Python, REST APIs, MySQL, Django (Web Framework), AWS, microservices, serverless application development, test-driven development (TDD), continuous integration and continuous delivery (CI/CD), and application security and monitoring.

## SKILLS

---

- **Front-End Development:** Proficient in HTML, CSS, and JavaScript. Experienced in creating responsive designs and user-friendly interfaces using React, Material UI, and (S)CSS.
- **DevOps:** Have some experience in managing and deploying application through docker containers using kubernetes orchestration system .
- **Version Control:** Experienced in implementing Version Control systems and creating and managing GitHub repositories using the command line.
- **Agile Development:** Proficient in Agile development methodologies, including Scrum and Kanban.
- **Project Management:** Skilled in project planning, organization, and execution, with a strong ability to manage time and resources effectively.
- **Communication and Teamwork:** Possess excellent interpersonal skills, with the ability to communicate effectively and collaborate with cross-functional teams.
